

CCIC COAL

Caracle Creek International Consulting Coal

CCIC Coal is a dedicated coal exploration company to **CCIC** as a shareholder of Caracle Creek International Consulting (Pty) Ltd. We provide specialist coal resource consulting, including target evaluation and project management. With professionals that have extensive experience within the sub-Saharan coal industry, **CCIC Coal** is perfectly situated to provide its clients with the necessary expertise to implement and manage coal exploration projects, resource evaluations and modelling. Since its inception, CCIC Coal has worked for numerous coal exploration and mining companies and have been instrumental in various listings on stock exchanges.

Industry Relations

CCIC Coal has a close working relationship with various specialists involved in the coal exploration evaluation value add chain, including environment companies, drillers, surveyors, process engineers, mining contractors and accredited laboratories.

Skills

Based on experience acquired in the coalfields of sub-Saharan Africa, CCIC Coal consider themselves to be an authority on coal exploration in this region, having been part of numerous teams that have taken projects successfully from exploration through to profitable extraction.

Technical Ability

CCIC Coal's professionals are accomplished users of Geosoft Target, which is utilised on a daily basis to update drilling programs, plan maps, cross sections, graphic boreholes logs, grids and contours. SABLE and GIBS database software are utilised to store and validate borehole and project data. Geological modelling and resource estimations are undertaken using Datamine and Minex.
